React Node AWS - Build infinitely Scaling MERN Stack App

Nikoloz Mchedlishvili

Senior Full Stack (React, Node JS, Mongo DB), AWS, AWS Lambda Developer
Tbilisi, Georgia

Summary

I'm React and Node JS, a Senior full stack developer with experience working in big multinational teams, mainly of US clients. Developed dashboards for big US financial services provider ABC Fitness, insurance company National Flood Services, and several other well-known companies using React Next JS, Typescript, Material UI, Chakra UI, Bootstrap, Styled Components, Redux, and other related frameworks or libraries that are used by front-end developers. In the back end, use Node JS, REST, and Mongo DB.

Use AWS services like EC2, S3, ELB, ASG, VPC, and so on.
Can design and implement application architecture on AWS using DinamoDB or RDS databases.

Have excellent communication skills, and speak fluent English and Russian. Love to ask questions and don't like silence when I have a coding problem because well-formulated question and interaction with teammates gives chance to move forward at a better pace.

Love to motivate others and try to understand clients' needs quickly.

Experience

Exadel
3 years 1 month

React Developer, Javascript Developer
October 2023 - Present (2 years 4 months)
Tbilisi, Georgia
